

Microbot Medical Announces Brigham and Women's Hospital as a Site for its Pivotal Human Clinical Trial

June 17, 2024

The Site Initiation Visit for the BWH clinical staff is complete and a shipment of LIBERTY investigational units was delivered

BRAINTREE, Mass., June 17, 2024 (GLOBE NEWSWIRE) -- Microbot Medical Inc. (Nasdaq: MBOT) today announces that Brigham and Women's Hospital (BWH), a leading academic medical center located in Boston, Massachusetts, will participate as a clinical trial site for the pivotal human clinical trial as part of its Investigational Device Exemption ("IDE") application for its LIBERTY[®] Endovascular Robotic Surgical System. Dr. Dmitry Rabkin, MD, PhD (Assistant Chief, Division of Angiography & Interventional Radiology) has been selected as principal investigator at BWH. "We are excited to participate in the clinical evaluation of this innovative technology," said Dr. Rabkin. BWH has completed the Site Initiation Visit, during which BWH clinical staff was trained on the clinical study protocols. In addition, a shipment of LIBERTY[®] investigational units arrived at BWH this week for the clinical trial.

"We are pleased to work with Dr. Rabkin and the team at Brigham and Women's Hospital on this clinical study," commented Harel Gadot, CEO, President and Chairman of Microbot Medical. "We believe their commitment to research and the advancement of science make them an ideal clinical study site."

The Company is in the process of engaging additional leading centers to participate in the clinical trial.

About Microbot Medical

Microbot Medical Inc. (NASDAQ: MBOT) is a clinical-stage medical device company that specializes in transformational micro-robotic technologies, with the goals of improving clinical outcomes for patients and increasing accessibility through the natural and artificial lumens within the human body.

The Investigational LIBERTY[®] Endovascular Robotic Surgical System aims to improve the way surgical robotics are being used in endovascular procedures today, by eliminating the need for large, cumbersome, and expensive capital equipment, while reducing radiation exposure and physician strain. The Company believes the LIBERTY[®] Endovascular Robotic Surgical System's remote operation has the potential to be the first system to democratize endovascular interventional procedures.
