- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.01 par value	MBOT	NASDAQ Capital Market

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (17 CFR §230.405) or Rule 12b-2 of the Securities Exchange Act of 1934 (17 CFR §240.12b-2).

Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

**Item 7.01 Regulation FD Disclosure.**

On May 31, 2023, Microbot Medical Inc. (the “Company”) issued a press release announcing that an additional milestone was achieved when medical professionals experienced the Company’s LIBERTY<sup>®</sup> Robotic Surgical System as part of a formative study. The study was designed to enable medical professionals, including physicians and Cath-lab technicians, to use and experience LIBERTY in a real-use simulated environment.

The press release, which is furnished as Exhibit 99.1 to this Current Report on Form 8-K, is incorporated herein by reference. The information in this Item 7.01 and Exhibit 99.1 is being furnished and shall not be deemed to be “filed” for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that section. This report will not be deemed an admission as to the materiality of any information in this Item 7.01 or Exhibit 99.1.

**Item 8.01 Other Events.**

On May 31, 2023, the Company announced that an additional milestone was achieved when medical professionals experienced the Company’s LIBERTY Robotic Surgical System as part of a formative study. The study was designed to enable medical professionals, including physicians and Cath-lab technicians, to use and experience LIBERTY in a real-use simulated environment.

The study included five teams, each consisting of an interventional radiologist and a Cath-Lab technician and simulated the expected clinical setup and use of the LIBERTY Robotic Surgical System. All participants were successfully trained on the system prior to their participation and the study validated that the LIBERTY Robotic Surgical System operation and setup are intuitive.

Analysis and data from the study exhibited high subjective grading both by the physicians and the technicians, with no comments made on the designed operative flow.

### **LIBERTY Robotic Surgical System Achieved Additional Milestone in its Path to First in Human and Regulatory Process**

*The data collected from the usage and experience of the medical professionals in the formative study will be used to support the Company's anticipated milestones*

**HINGHAM, Mass., May 31, 2023** – Microbot Medical Inc. (Nasdaq: MBOT), the developer of the LIBERTY<sup>®</sup> Robotic Surgical System, the first single-use endovascular surgical robotic system, announces that an additional milestone was achieved when medical professionals experienced the Company's LIBERTY Robotic Surgical System as part of a formative study. The study was designed to enable medical professionals, including physicians and Cath-lab technicians, to use and experience LIBERTY in a real-use simulated environment.

The study was performed and managed by experts from a company specializing in conducting Human Factors and Usability Engineering tests of medical devices.

The study included five teams, each consisting of an interventional radiologist and a Cath-Lab technician and simulated the expected clinical setup and use of the LIBERTY<sup>®</sup> Robotic Surgical System. All participants were successfully trained on the system prior to their participation and the study validated that the LIBERTY Robotic Surgical System operation and setup are intuitive.

Analysis and data from the study exhibited high subjective grading both by the physicians and the technicians, with no comments made on the designed operative flow.

"Educating and establishing close relationships with our target audience, enables the Company to gain valuable feedback and increase awareness to our unique system. In parallel to our regulatory and pre-clinical efforts, we invest in receiving endorsements from leading experts and institutes which we believe will allow us to leverage our path to the clinical stages and later on to the market," commented Eyal Morag, Chief Medical Officer.

#### **About Microbot Medical**

Microbot Medical Inc. (NASDAQ: MBOT) is a pre-clinical medical device company that specializes in transformational micro-robotic technologies, with the goals of improving clinical outcomes for patients and increasing accessibility through the natural and artificial lumens within the human body.

---

The LIBERTY<sup>®</sup> Robotic Surgical System aims to improve the way surgical robotics are being used in endovascular procedures today, by eliminating the need for large, cumbersome, and expensive capital equipment, while reducing radiation exposure and physician strain. The Company believes the LIBERTY<sup>®</sup> Robotic Surgical System's remote operation has the potential to be the first system to democratize endovascular interventional procedures.
